

CLEAN ROOM

Your partner for pristine production

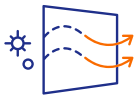

Our Class 8 Clean Rooms provide an ultra-clean environment for the assembly and manufacturing of sensitive products in medical, pharmaceutical, and electronics industries. These controlled spaces minimize contamination, ensuring high cleanliness and product integrity standards.

With these facilities, you can be confident that your products meet stringent industry requirements for sterility and performance.

CLEAN ROOM SERVICES

- Clean Room Assembly – Our clean room assembly services provide a sterile environment for assembling complex products. This is crucial for industries such as healthcare, where product sterility and precision are paramount.
- Packaging – We offer clean room packaging services to protect your products from contamination during transit and storage. Our packaging processes adhere to strict cleanliness protocols, ensuring that your products remain sterile and secure.
- Sealing – Our clean room sealing services provide airtight and contaminant-free seals for your products. This is critical for products that require protection from environmental factors such as moisture and particulates.

CLEAN ROOM

Where quality is crafted cleanly

CLEAN ROOM FAQs

What is our clean room classification?

- Our clean room is classified as Class 8, ensuring minimal airborne particles for ultra-clean manufacturing conditions.

What services are available in our clean room?

- We offer assembly, packaging, and sealing services, maintaining the highest cleanliness standards for sensitive components. We also provide specialized molding services in our Medical Manufacturing Room.

Can our clean room be rented as a standalone service?

- Yes, our Class 8 Clean Room is available for rent, offering you flexibility without the need for long-term infrastructure investments.

Which industries benefit most from our clean room?

- Industries like healthcare, pharmaceuticals, and electronics, where sterility and contamination control are vital for product quality and safety, benefit from our services.

How do we maintain cleanliness and sterility in our clean room?

- We adhere to strict cleaning protocols, regular particle monitoring, and ISO standards to ensure a consistently sterile environment for all production needs.
