Lifecycle Stages

Comprehensive Support from Initial Prototyping to Scalable Production

Prototyping

At Aprios, we offer fast and accurate prototyping services, turning your ideas into tangible products in record time. Our team understands the complexities of product development, providing quick-turn tooling and additive manufacturing using advanced Carbon 3D technology.

FAST VALIDATION

Common Challenge: Rapid cycles pressure teams for quick prototype delivery.

Our Solution: We offer quick turnaround times, turning concepts into prototypes in just three weeks, to deliver accurate, high-quality prototypes.

MINIMIZED DELAYS

Common Challenge: Delays in prototyping stall your development and iteration process.

Our Solution: We provide rapid prototypes and DFM suggestions for efficient testing and iteration, minimizing errors.

MATERIAL EXPERTISE

Common Challenge: Complexity in choosing the right materials for projects.

Our Solution: Assistance in selecting optimal materials.

Production

At Aprios, we understand the challenges faced by Supply Chain and Procurement Managers, such as poor quality from overseas manufacturing and inconsistent supplier performance. Our tailored solutions for vendor consolidation and reshoring can help mitigate these issues.

MOLD TRANSFER

Common Challenge: Poor parts, communication failures, and missed deadlines can disrupt production and quality.

Our Solution: Efficient management of mold transfers to keep production on track.

VENDOR CONSOLIDATION

Common Challenge: Complexities of handling multiple suppliers can lead to inefficiencies and increased costs.

Our Solution: Streamline operations and manage all your needs by working with a single reliable partner.

RESHORING

Common Challenge: Global events cause delays and increased costs.

Our Solution: Support for bringing production back to local facilities.
